

Dr Martin Stirling

DIRECTOR - POWER TOOL INDUSTRY

Martin Stirling is the Head of Sustainability and Regional Process Lead for After Market Services at Hilti Australia.

Martin is originally a mechanical engineer, who did post graduate studies in materials engineering into fly ash. Following this, he worked in the field of synthetic diamond materials for tooling in manufacturing and construction.

Since 2004, he has worked with Hilti Australia in a variety of roles, mostly aimed at bringing safer, more productive solutions to contractors in the building industry when using power tools to perform drilling, grinding, cutting and breaking applications. His current role as head of sustainability includes working with internal and external stakeholders to reduce Hilti's local carbon footprint, as well as maintaining responsibility for health and safety.

He has a passion for simplicity in our increasingly complex world, loves the outdoors and is a competitive runner who also does the occasional triathlon.
